

Deployment Guide (README)

Author: Anumari Jyothi
Department: Department of Statistics
Institution: Pondicherry University
Platform: IBM SkillsBuild Internship Project

Deployment Blueprint Guide

This project contains the complete predictive analytics system deployed for the IBM SkillsBuild Internship Program.

Step-by-Step Installation Instructions

1. Ensure Python 3 environment is operational on your machine.
2. Open your standard terminal terminal/Command Prompt dashboard and run the following command to download essential packages:

```
pip install pandas numpy scikit-learn
```

3. Place the target heart.csv data metric sheet inside the exact workspace directory.
4. Launch the local jupyter platform server using your command tool:

```
jupyter notebook
```

5. Copy and execute the provided code module directly inside a clean execution block.
